GLOBALG.A.P. IT platform: Important information on certification status

Dear stakeholders,

We would like to share an important update on the **validation of certification status** in the GLOBALG.A.P. IT platform.

To accommodate current data handling protocols, certificate validation for larger groups may not be available. We are advising retailers, traders, and other buyer stakeholders – as a temporary measure until the restriction is lifted – to **directly contact the respective certification bodies** to confirm the status of any affected suppliers.

This is a temporary solution to address market needs considering the delays occurring in certification processing due to the transition.

Thank you for your understanding.

Kind regards,

Elmé Coetzer-Boersma
Chief Executive Officer
